

# Oriola strengthens Swedish operations with automation investment in Enköping

Oriola Corporation Investor news 26 March 2026 at 10:00 a.m. EET

## Oriola strengthens Swedish operations with automation investment in Enköping

Oriola will invest approximately EUR 5 million to modernise and expand the automation capabilities at its distribution centre in Enköping, Sweden. The investment supports the execution of Oriola's strategy and strengthens the company's ability to respond to market growth and evolving customer requirements.

Oriola's distribution network in Sweden consists of a central warehouse in Mölnlycke and the Enköping distribution centre, which today forms the cornerstone of Oriola's delivery operations. Since the last upgrade at the Enköping site, the Swedish pharmaceuticals market has continued to grow steadily, and customer expectations for reliable and efficient deliveries have increased.

The investment will:

- Increase level of automation resulting in improved operational efficiency and competitiveness
- Support continued growth in Oriola's wholesale and distribution businesses in Sweden
- Enhance customer-centricity by improving reliability and responsiveness to customer needs

"The Swedish market is evolving at pace, and our customers expect high reliability as well as capacity to support their growth. This investment strengthens the long-term role of Enköping as a key logistics hub and ensures that we can respond to market needs with greater efficiency. By expanding automation, we are not only increasing capacity but also laying the groundwork for future growth together with our customers," says Tuomas Tiilikainen, Chief Supply Chain Officer

Following the upgrade, Oriola will have a more efficient and scalable infrastructure that better supports market growth and evolving customer requirements, while advancing the company's strategic goal of becoming the leading specialist in the wholesale of pharmaceuticals and health products.
