“Our Swedish businesses performed extremely well. In Finland and the Baltic countries our operations were stable. We decided to sell our unprofitable Russian businesses.”
Our Swedish businesses performed extremely well

We set three key goals for 2014: to successfully implement the new main logistics centre in Russia, to increase the profitability of the pharmaceutical wholesale business in Russia and to complete the integration of the retail business in Sweden.

In Sweden our goal was to complete the integration of Medstop. I am very satisfied with the work that was carried out, and we achieved all the targets set for the acquisition during 2014. We also continued to develop our product selection and customer loyalty programme. In October, Kronans Apotek celebrated its millionth customer club member. At the same time, excellent efforts were being made to improve efficiency, quality, profitability and customer satisfaction in the pharmaceutical wholesale business in Sweden. The development projects that were launched the previous year and the focused and methodical work on these projects are now producing results.

In Finland and the Baltic countries we have been working hard on developing our services business. We successfully renegotiated our agreements with important pharmaceutical companies. We also continued to develop our e-services. In September, Orion’s traded goods were added to the oriolashop.fi webshop, significantly increasing the product selection. As a consequence of the growth in clientele and product selection, oriolashop.fi’s sales increased during the latter part of the year.

In Finland and the Baltic countries our operations were stable

In the Baltic countries we successfully launched new service concepts. We launched the internetapistieka.lv webshop during the beginning of the year and reinforced our online pharmacy operations by acquiring a pharmacy in the centre of Riga. We started to produce Oriola AB’s repackaging services in Lithuania and were able to maintain our solid position in our pre-wholesale business.

We decided to sell our unprofitable Russian businesses

In spite of our hard work and the various measures taken, we were unable to achieve profitable wholesale operations in Russia. On account of the developments taking place in the market environment and our profitability outlook for the coming years, we took the decision to sell our Russian businesses. We had to carry out the sale in very challenging market conditions, so the successful finalization of this sale can be considered a good achievement.

I would like to take this opportunity to thank our shareholders, customers and employees for the year 2014.

Eero Hautaniemi

FOR 2015 WE HAVE THREE MAIN GOALS:

These main goals cover all our businesses and countries of operation.

• Development of digital channels.
• Improving service businesses and expanding to healthcare B2B market.
• Improving efficiency by exploiting group synergies.
BUSINESS REVIEW

PHARMACEUTICAL TRADE IN SWEDEN
Oriola-KD is the third biggest operator on Sweden’s pharmacy market and has been a pharmaceutical wholesaler in Sweden for more than 100 years.

Kronans Apotek, which belongs to Oriola-KD, is Sweden’s third biggest pharmacy chain and has a nationwide network of pharmacies. Kronans Apotek is known for its impeccable customer service and high-quality wellbeing and lifestyle products. At the end of 2014 there were 304 Kronans Apotek pharmacies in Sweden.

Oriola AB is a Swedish pharmaceutical wholesaler. Oriola AB provides pharmacy chains with pharmaceutical distribution, logistics and purchasing services. Oriola’s customers are pharmaceutical companies, pharmacies, hospitals, veterinarians and grocery stores.

PHARMACEUTICAL TRADE IN FINLAND AND THE BALTIIC COUNTRIES
Oriola Oy is a Finnish pharmaceutical distributor, service provider and marketer of health and wellbeing products. Oriola Oy’s customers comprise pharmaceutical companies, pharmacies, veterinary practices, grocery stores, health stores, hospitals and healthcare personnel. Oriola offers its customers a range of logistical services covering storage, picking and distribution of pharmaceuticals. In addition, Oriola provides various Oriola+ value added services.

Oriola Oy’s Consumer Health business unit markets and sells consumer healthcare products to pharmacies and grocery stores. Its product portfolio includes vitamins, dietary supplements, pharmaceutical cosmetics, skincare products, tests, sports drinks and wound care products. Oriola’s product selection includes Finland’s leading healthcare and wellbeing brands, such as Avène, Gefilus, Lysi and Pharmacare.

Oriola’s business operations in the Baltic countries comprise pharmaceutical wholesaling, logistics services for pharmaceutical companies and the marketing of health and wellbeing products in Estonia, Latvia and Lithuania. Oriola is responsible for marketing and distribution of MSD’s pharmaceuticals in the Baltic countries. In 2014 Oriola launched an internet pharmacy internetaptieka.lv in Latvia and owns two pharmacies in Riga.

ORIOLA-KD IN 2014
• Successful completion of the integration of Medstop and development of our product portfolio and customer loyalty programme in the Swedish retail business.
• Increased volume of the business and efficiency programme carried out in the Swedish wholesale business.
• Entering the consumer business with the oriolashop.fi and internetaptieka.lv webshops in Finland and the Baltic countries.
• Selling the Russian businesses to the Russian pharmacy chain CJSC “Apteki 36.6” on 8 December 2014.

Pharmaceutical markets across Europe are going through considerable changes. For Oriola-KD, the changing business environment provides new business opportunities.

The amount of ageing population is increasing rapidly and the need for healthcare services is growing. More and more of the new pharmaceuticals are expensive biomedicines for specific uses. On the other hand, patent expirations are leading to an increase in the proportion of generic pharmaceuticals.

The pharmaceuticals market is starting to polarize, as the shares of very inexpensive and very expensive pharmaceuticals are growing. These changes are creating pressures on pharmaceutical companies and pharmacies to change their operations. Pharmaceutical companies will focus more on their core business and the role of pharmacies in society will change. Oriola-KD holds a unique position and specialist knowledge of the Nordic markets. The changes in the business environment provide an excellent opportunity for Oriola-KD to transform itself from a traditional pharmaceutical wholesale company into a pharmaceutical services provider with a wide service portfolio in the Nordic countries.

Consumers are becoming more technically oriented and expecting services to be available 24/7. At the same time, they appreciate commitment and a personal, consistent customer experience. The retail industry is undergoing a digital transformation and the availability of e-services must be ensured. Oriola-KD wants to be part of this revolution and offer its customers a wide product assortment and a superior digital customer experience.
The changing business environment provides new business opportunities for Oriola-KD. To ensure our competitiveness in the changing environment, we are constantly developing our operations.

We will focus on improving our management of the entire supply chain in both our retail and wholesale business. We will also investigate the possibilities for expanding into new business areas in veterinary pharmaceuticals and the hospital business in Sweden. For pharmaceutical companies and pharmacies we aim to offer new solutions and the best customer experience in the market.

We will continue to develop our services business and to strengthen customer relationships in all of our markets. Our aim is to offer a superior digital customer experience to consumers and our other customers and to continue developing our webshops and online services. To ensure this, we will work more intensively and in cooperation with all our business units. We will begin by standardizing our processes and then developing our information systems.

**WE WILL ENHANCE OUR POSITION IN THE PHARMACEUTICAL CHANNEL:**
- Improve management of the entire supply chain
- Enter the growing niche markets in B2B healthcare
- From traditional wholesale business towards pharmaceutical service business
- Integrated distribution and service platforms
- Extended product assortment
- Multiple channels to fulfill our customers’ needs, including innovative digital solutions
- Common solutions and processes

**SWEDEN PROFIT GROWTH**
Optimizing the entire supply chain from pharmaceutical companies to pharmacies will create clear competitive advantages and growth opportunities. We will also investigate possibilities for expanding into new business areas in veterinary pharmaceuticals and the hospital business.

**DIGITAL CUSTOMER EXPERIENCE**
We aim to offer a superior digital customer experience, including high-quality customer services and a wide product assortment in our webshops. We will develop our existing webshops and the product assortment in oriolashop.fi and internetaptiek.lv in Finland and Latvia. In Sweden we are planning to open webshop both for consumers and business customers in 2015.

**PHARMA SERVICES IN THE NORDICS**
We offer solutions to meet the needs of our customers – pharmaceutical companies, pharmacies and veterinary clinics. We develop common service concepts and service models in the Nordic countries and the Baltic countries.
